## Willenken Firm and Five Partners Recognized by Benchmark Litigation 2019

---

October 25, 2018

*Benchmark Litigation*, the definitive guide to elite litigation firms and attorneys throughout North America, has once again recognized **Willenken Wilson Loh & Delgado LLP** and its five partners for their excellence in litigation and client service. In the 12<sup>th</sup> edition of *Benchmark Litigation's* annual publication, the firm is named on the highly selective list of "Recommended" firms for litigation in California for the second consecutive year. Each of the firm's five partners – **Eileen Ahern, William Delgado, Paul Loh, Megan O'Neill**, and **Jason Wilson** – is recognized as a "State Litigation Star" in the nationwide publication. This coveted ranking is reserved for lawyers who are consistently recommended as reputable and effective litigators by clients and peers. The five partners are also each selected as a "Benchmark California Star" in the inaugural edition of *Benchmark Litigation California*, a stand-alone guide that focuses exclusively on the state's litigation market.

Clients spoke candidly to *Benchmark Litigation* researchers about their experience with the firm, describing the service as "top-notch" and the attorneys as "highly capable, conscientious, and responsive." One proclaimed, "Willenken is prepared to aggressively pursue matters and proceed to trial when circumstances warrant."

**About *Benchmark Litigation*:** Now in its 12<sup>th</sup> year of publication, *Benchmark Litigation* is the only independent guide focused exclusively on identifying and ranking leading litigation attorneys and firms at the local and national levels in North America. The ranking results are the culmination of a six-month research period during which researchers conduct extensive interviews with litigators and their clients. The researchers examine recent casework handled by the firms and ask sources to offer their professional opinions on litigators practicing within their state or national practice areas.
